PLATINUM

AUTOMOTIVE BATTERIES

Today's automobiles and light trucks require batteries that will start the vehicle in extreme weather conditions and run all of the power-hungry accessories. The FVP Platinum Automotive and Light Truck Batteries are 22%* more powerful than the FVP VoltEdge Batteries. They are specifically designed to provide maximum cranking power to start the vehicle and run the electronic accessories when the vehicle is turned off. Each FVP Platinum Battery is engineered to meet exact OE fitment specifications and is backed by a nationwide free-replacement 30-month warranty.

*Comparison of Cold Cranking Amp Ratings for FVP batteries within the same BCI Group

High Cold Cranking Amps and Reserve Capacity Ratings

- Has the power to start the vehicle and run all of the electronic accessories found on today's vehicles

New Calcium/Tin Alloy

- Reduces self-discharge for long lasting durability
