

FVP Filter Warranty

FVP Filters are warranted to be free from manufacturer's defects in materials, workmanship or design in accordance with the terms and conditions described below

FVP Filters meet or exceed Original Equipment Manufacturer(s) (OEM) requirements and are tested in accordance with the Society of Automotive Engineers' (SAE) test procedures.

New car warranties remain in effect when FVP Filters are used in accordance with the engine manufacturer's change intervals.

In the unlikely event of an engine failure directly caused by a defective FVP Filter, which was properly installed and changed following the engine manufacturer's recommended service intervals, the manufacturer warrants that it will pay for the repair or, if necessary, replacement of an engine or other parts damaged as a result of the defect in any of its filters.

Claims for engine repairs provided under warranty must be submitted within 30 days after discovery of the damage. The filter must be returned for examination. No claims will be considered unless the filter in question is submitted. A delegated laboratory assigned by ID USA will have the right to examine the engine and filter to determine the amount of damage and whether it was caused by a defective FVP Filter.

This warranty DOES NOT COVER any product that has been subjected to misuse, neglect, negligence or accident, or that has been improperly maintained, operated, or installed. The warranty DOES NOT APPLY to any damage to the product that is the result of rust or corrosion.

This warranty is in lieu of all other warranties expressed or implied, including the implied warranty of merchantability and fitness for a particular purpose which are expressly excluded. The manufacturer shall not be liable for consequential or incidental damages resulting from or caused by the use, operation, failure or defect in any FVP Filter.

This warranty gives you specific legal rights. You may also have other rights which vary from state to state.
