

The Confident Solution.®

SERPENTINE AND V-BELTS

FVP Serpentine and V-Belts recognize that reliability is the most critical attribute to belts. That is why FVP Serpentine Belts, are OE-quality and always correct in form, fit, and function. FVP Serpentine Belts come in a wide range of sizes and are designed to be oil-resistant and temperature-stable from -30°F to 140°F (-34°C to 60°C). They deliver 98% power efficiency, while the lower profile design easily handles higher engine revs, reducing noise and providing cooler running temperatures. Plus, with service life intervals of up to 100,000 miles with no re-tensioning required, you don't need to worry about come-backs.

- EPDM compound
- Polyester fiber tensile members
- Straight ribbed belt design
- Highly flexible
- Abrasion and oil/chemical resistant
- Temperature-stable from -30°F to 140°F
- 3 year/unlimited miles warranty
