

# MASTER CYLINDERS

FVP Master Cylinders meet or exceed OE and each unit is pressure tested before it leaves the factory. Free technical phone and online support are available for you when you need it.

- **100% New Components and Assemblies**
- **New Negative-Ground Switch Sensor Fittings**  
Eliminates the transfer of potentially faulty sensors, leading to possible misdiagnosis and future service requirements.
- **Premium Grade Reservoirs**  
Resistant to cracking during sudden fluctuations in operating temperatures.
- **Precision Machined Bores and Pistons**  
Micro-finished surfaces provide the foundation for smooth, consistent and trouble free braking power when you need it most.
- **100% Computerized Multi-Stage Testing**  
Tested under load on MPA-designed and built computerized testers. Our quality standards ensure performance right out of the box.
