

BRAKE HARDWARE

Ensure like-new braking performance with new hardware.

DISC BRAKE HARDWARE KITS

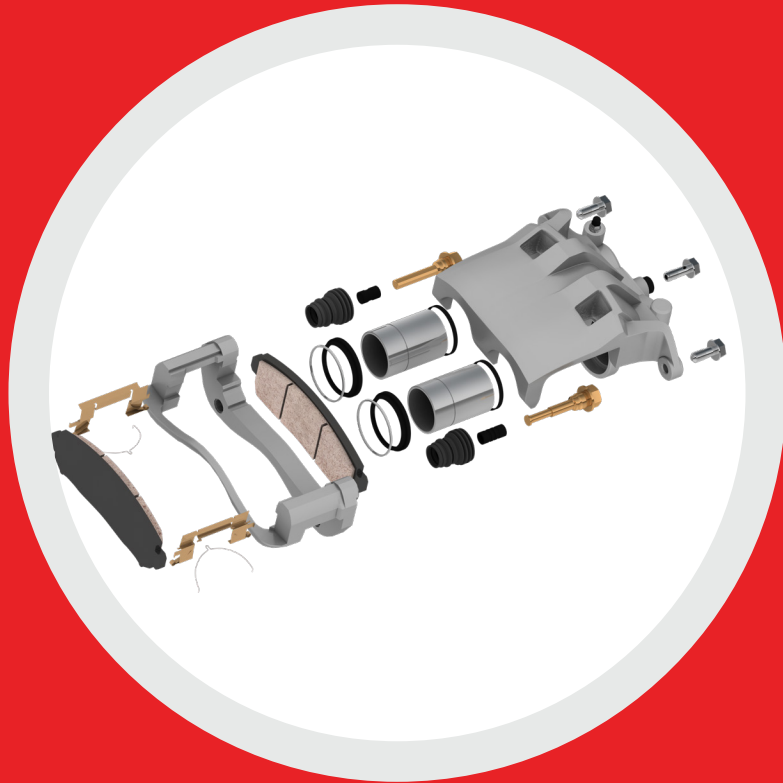

DRUM BRAKE HARDWARE KITS

CALIPER MOUNTING BOLTS

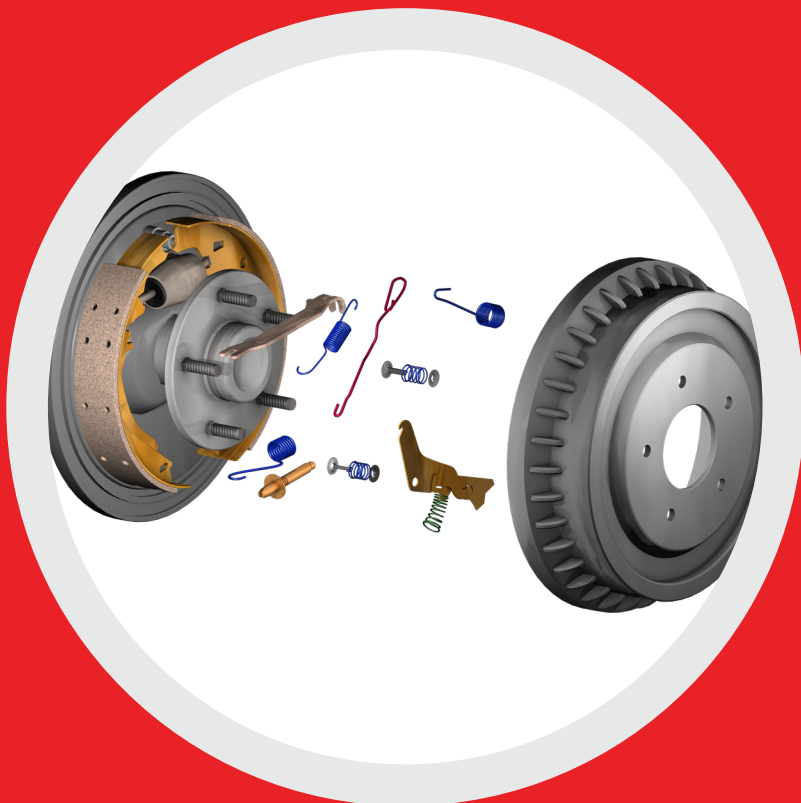

BRAKE PAD ELECTRIC WEAR SENSORS

DISC BRAKE HARDWARE KITS

Eliminate Noise, Eliminate comebacks

- FVP Disc Brake Installation Kits are all you need to restore "like new" braking
- Abutment clips featuring QuietGuide Technology. Clips coated with PTFE on one side to reduce drag and vulcanized rubber on the other to reduce noise
- Built with stainless steel for corrosion free performance

DRUM BRAKE HARDWARE KITS

Maximize braking performance with Drum Brake hardware kits

- Includes return springs, hold down parts, adjusting screws and adjusting springs
- Minimize brake drag to improve gas mileage
- Prevent premature brake wear
- Restore brakes to like new performance

CALIPER MOUNTING BOLTS

Finish the job with new caliper bolts

- Preloaded with anti-seize
- Covers 150 million vehicles
- Save time and money with 'Time Saver' Assortments
- Certified for fit and performance

BRAKE PAD ELECTRIC WEAR SENSORS

Wear sensors made easy

- 98% coverage for domestic and import vehicles
- Over 25 million vehicles covered
- Engineered and tested to ensure electrical, thermal and mechanical properties meet or exceed OE requirements

WHY INSTALL NEW HARDWARE WITH EVERY BRAKE JOB?

VIRTUALLY **ELIMINATES** BRAKE NOISE.

Independent testing shows that noise at 70 decibels is still evident when re-using worn hardware. That's as loud as a household vacuum!

PROTECTS YOUR CUSTOMERS INVESTMENT.

New brake hardware helps maintain pad alignment and even contact with the rotors – ultimately reducing the chances of irritating brake noise, brake drag, soft pedal feel and uneven, premature brake pad wear.

IT'S **EASY** AND **AFFORDABLE**.

It only takes a few extra minutes during a pad and rotor replacement to install new brake hardware – an inexpensive way to ensure a complete brake job.

LIKE NEW!

OPTIMIZES BRAKE PERFORMANCE.

New brake hardware, along with new pads and rotors, restores braking to "like-new" performance.

REDUCES BRAKE DRAG.

Wear from unwanted kinetic friction can cause premature or uneven wear and reduce pad life.

CONSUMER **PREFERRED**.

Be sure to recommend new brake hardware as eight out of ten customers buying brake pads indicate they would purchase new brake hardware if a professional **LIKE YOU** recommends it!
