

# FVP FUEL PUMP PROGRAM UPDATE

## New Vendor, Expanded Inventory

### FUEL PUMPS

Fuel pump assemblies, fuel strainers, electric and mechanical fuel pumps for all-makes, all-models covering over 75% of the market.

- Meets or Exceeds the Performance of the Original Part
- Includes All Applicable Installation Components
- Application Fit Tested for Perfect Guarantee
- 100% Performance Tested to Ensure Long-Lasting Quality
- Limited Lifetime Warranty

**FVP FUEL PRODUCTS** feature product improvements to ensure they meet or exceed the performance of the original part and pass quality control testing for long-lasting quality.

### COMMUTATOR

- Turn-of-the-century GM trucks used a copper commutator fuel pump that was prone to failure from high flow erosion
- FVP utilizes carbon commutators to prevent premature failure
- Carbon material lasts longer and offers better resistance to contaminated fuel

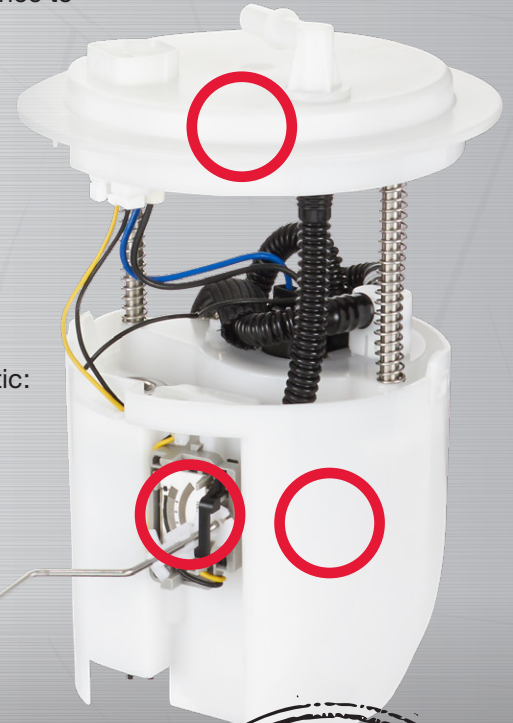

### PLASTIC MATERIAL

- POM is a very resistant plastic that protects inlet/outlet tubes during installation
- POM is less fragile than the PBT used by most aftermarket competitors
- The Fuel Module is completely made from POM plastic: connector, rheostat housing and inlet/outlet tubes

### RHEOSTAT CARD

- Palladium-silver alloy replaces common copper alloy for better durability against contaminated fuel
- Rheostat curved design allows for measurement accuracy and continuity
- OE-style 5-pronged wiper component
