

FVP FUEL FILTERS

WE HAVE THE RIGHT FILTER FOR WHATEVER YOU DRIVE

FVP Fuel Filters are designed to trap the dirt, rust and other particulate contaminants that can otherwise cause engine hesitation, loss of power, hard starting, etc. FVP Fuel Filters help to protect the most expensive parts of the engine by filtering out foreign particles that can damage a fuel injector resulting in erratic performance, poor gas mileage and in some cases, complete engine shutdown.

Every FVP Fuel Filter is built to the same stringent standards used by the factory. These direct replacement fuel filters always meet the requirements of their specified vehicle application whether it's an older model fitted with a carburetor or one of the high tech, fuel injected delivery systems. FVP Fuel Filters are manufactured in strict accordance with the ISO9001 Quality Management System.

Features and benefits

- Direct replacement for the stock fuel filter, which meets or exceeds original equipment specifications.
- FVP Fuel Filters are available in a many configurations including inline filters, cartridge filters, etc. for wide range of U.S. and import vehicles.
- Trapping of contaminants improves fuel system efficiency and overall vehicle performance.
