VoltEdge®
BATTERIES

AUTOMOTIVE BATTERIES

Automotive and Light Truck applications require batteries that perform in extreme weather conditions. From bitter arctic cold to extreme desert heat, FVP VoltEdge batteries are ready when you need them. FVP VoltEdge batteries are specifically designed to perform under the high heat conditions of today's smaller engine compartments and to provide maximum cranking power when needed.

FVP's "Flex Rib" technology controls the excessive vibrations encountered on even the worst road conditions. Each FVP VoltEdge battery is engineered to meet exact OE fitment specifications.

FVP Automotive and Light Truck batteries are also available with a supplemental five year free replacement warranty.

Maintenance Free Design

- Sealed case for safety and protection

Integrated Fold Down Handle

- Safe and easy handling

Built in Flame Arrestor

- Reduces chance of explosion from igniting battery gases

Extrusion Welds

- Intercell connections reduce stress from extreme heat and cold conditions

Flex Ribs

- Maintains battery plate integrity in extreme road conditions

Calcium-Calcium Plate

- Long lasting durability, allows for sealed battery design

Envelope Separators

- Encloses plates to ensure longer life and prevents battery from shorting

Expanded Wrought Grid Calcium Plate

- Increased durability and reduced corrosion
- Enables higher cranking amps
