VERIFIED. PROVEN.™

SERPENTINE AND V-BELTS

FVP Serpentine and V Belts are designed as an OEM replacement belt that restores the vehicles drive belt system to original specifications. All FVP serpentine belts are constructed with EPDM rubber and reinforced with synthetic fibers. The specially compounded EPDM rubber provides quiet operation while the synthetic fibers provide 98% power efficiency and dimensional stability. FVP belts do not require re-tensioning and provide a service life up to 100,000 miles. The FVP belt product line offers full coverage for domestic and import applications. Install with confidence knowing that FVP belts provide quiet and dependable operation for your customers.
